Sustainable Shipping Beyond 2020- Considerations for Littoral States in SOMS

Elfian Harun

Environment Manager &

Assistant Regional Manager Asia-Pacific

INTERTANKO

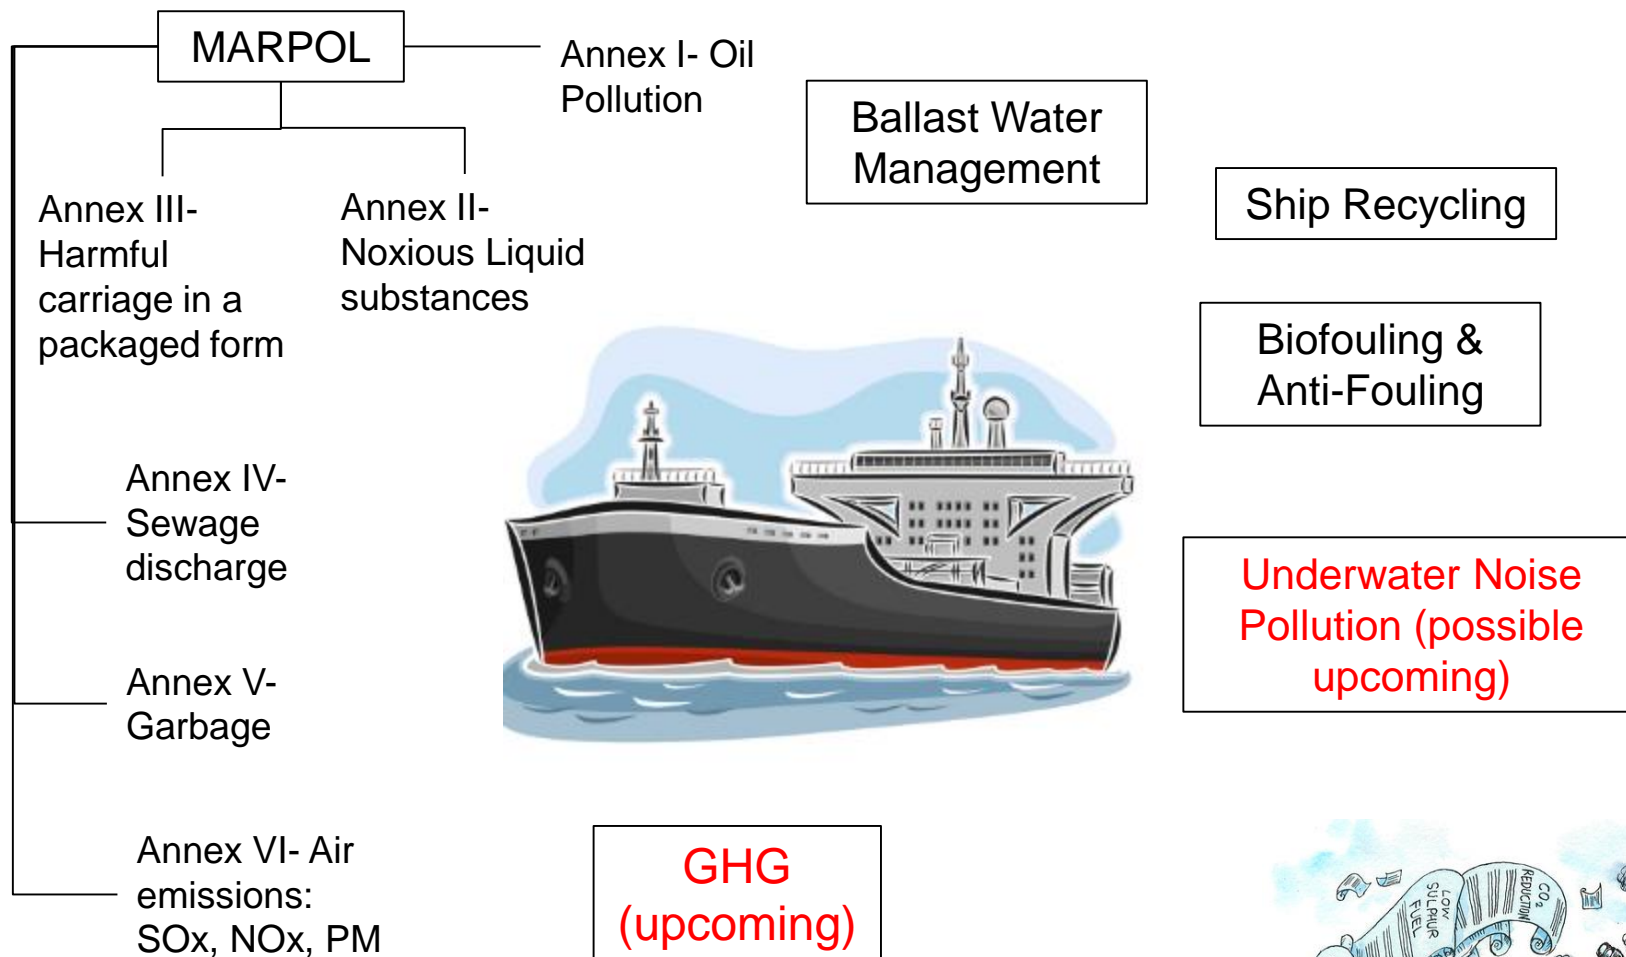

1. Overview of Environmental Regulations post 2020
2. INTERTANKO's "wish list"
 - a. IMO 2020
 - b. Ballast Water
 - c. Biofouling & Antifouling
 - d. Port Reception Facilities
 - e. Feedback mechanism for SOMS/ CF-related projects

Environmental Regulations

INTERTANKO

a. MARPOL

i. IMO 2020-related issues

1. Wash water from open loop scrubbers
 - a. Options available for ships fitted with open loop scrubbers in SOMS
 - b. Need for clarity on area where ban on wash water is effected in SOMS (eg. Territorial water vs port limits vs specified NM)
2. Port reception facilities
 - a. Facilities for residue from scrubbers
 - b. Facilities for non-compliant fuel
3. Uniform implementation of MARPOL Annex VI
 - a. Detection of ships using non-compliant fuel in SOMS
 - b. Co-ordinated enforcement efforts

ii. Port reception facilities database for SOMS

b. Ballast Water

- i. Synchronised interpretation for Ballast Water Record Book
- ii. Same Risk Area for Ballast Water Management in SOMS

c. Areas for hull cleaning activities

- i. Consistent requirement and standard
- ii. Provision of service providers

d. Proposed mechanism for Industry feedback to be incorporated in SOMS/CF-related projects
